

## 7.2 Visual Customisations

While Predictable's themes offer the option to change the entire appearance of the app, you can also customise specific elements.

First, there are a number of different fonts to choose from including: Montserrat, Lora, Roboto, OpenDyslexic, Source Serif, Nunito, Open Sans, and Lato.

Color Code buttons allow you to individually customise the Background Colour and Font Size and Colour for different elements within the app. The table below shows which visual customisations are available for each feature.

<b>Feature</b>	<b>Background Colour</b>	<b>Font Colour</b>	<b>Font Size</b>
History Strip	✓	✓	✗
Favourite Strip	✓	✓	✗
Message Window	✓	✓	✓
Word Prediction	✓	✓	✓
Keyboard Keys	✓	✓	✗
Function Keys Top Screen	✓	✓	✗
Function Keys Bottom	✓	✗	✗
Phrases	✓	✓	✗
Categories	✓	✓	✗
Grid Layout Background	✓	✓	✓
Cell Background	✓	✗	✗

Finally you can enable or disable Keyguard friendly view. The Keyguard UI is optimized to be used in tandem with a keyguard. The UI is designed as a 10 by 9 Grid. If you disable this feature, the Message Window will be optimised for normal tablet usage.
